14.	Per Day Usage (Approx.)	520 users

Note:

To calculate the average per day usage, the information provided in the above table is used where the count of all the physical users in all locations (students and teachers) and the number of e-access are summed up for the entire year from the monthly data. This sum is divided by the total number of working days in the year to compute the per-day use.

The data for Online information services provided through Mobile devices, emails and users using the reference section and users visiting the circulation counter / Librarian for enquiry are not accurately recorded. Hence the total visits in the Library are based on approx. Check-in and check-out counts (Transactions) were calculated manually and on observations during the period. The computerised system was affected due to technical issues in the server and loss of connectivity.
